The Guillotine system by EmkoBoard offers adjustable height functionality, enhanced protection, and dual-purpose usability. With a customizable height feature for ergonomic use, it allows users to set and lock the display position. A protective panel ensures the interactive flat panel's safety when not in use, extending its durability. The system also integrates a white enamel board with the interactive panel, enabling seamless transitions between digital and traditional writing surfaces, making it an ideal solution for versatile teaching and presentation needs.

Size is optional.

Item No	Product	Definition
